DESCRIPTION

Marble extracted in central Italy and coming from the same family as classic travertines. Its main color is dark brown, whose shades alternate depending on the extraction area and vary from block to block. Darker veins cross the slabs horizontally making each creation unique. Usually cut on the cross, this sedimentary limestone rock is particularly resistant to impacts and temperature variations, for this reason it is used in construction for the creation of internal and external environments.

Applications: claddings, floor tiles, kitchen and bathroom vanity tops

Finishing: Brushed, Bushhammered, Flamed, Honed, Polished, Waterjet

SCS: *Stone Care System highly recommended for a longer duration.*
