

TECHNICAL INFORMATION

Measures: **300 x 175 cm**
Thickness: **2 cm**
Applied finishing: **Polished**
Cod: **bg18117**
Type: **Marble**
Origin: **Namibia**
Color: **White**
Prices range: **Premium**

DESCRIPTION

Born from the silent heart of Namibia, Oyster Namibia marble is a creation of nature that embodies the essence of an ancient and mysterious land. Its slabs seem to hold the memory of the desert: a warm, ivory-like white spreads out like a canvas upon which the African earth has traced unique veins and shades. Every movement, every line tells a different story: the dance of the wind across the dunes, the passage of time engraved in stone. This natural stone captivates with its visual harmony, able to give any space a refined yet understated character. Its soft and unpredictable veining ranges from golden beige to pearl grey, creating a visual depth that perfectly balances elegance and authenticity. On a technical level, Oyster Namibia stands out for its excellent physical and mechanical properties: its hardness and compactness ensure resistance to wear and impact, while its low porosity makes it non-absorbent and easy to maintain. Thanks to these qualities, it is an ideal choice for flooring, wall cladding, staircases, and bathroom or kitchen tops, both in residential and high-end commercial settings. Whether polished, honed, or brushed, it always retains its natural charm,

reflecting light in a subtle and refined way. Oyster Namibia is more than a marble — it is a fragment of the African landscape transformed into a work of art, bringing the warm, timeless breath of nature into contemporary architecture.

Applications: claddings, floor tiles, kitchen and bathroom vanity tops

Finishing: Brushed, Bushhammered, Flamed, Honed, Polished, Sandblasted, Waterjet

SCS: *Stone Care System highly recommended for a longer duration.*
