## DESCRIPTION

Travertino Titanium is a sedimentary limestone rock, which appears as a variant of the classic travertines: the darker tones are close to black, and mix with smoky movements alternating between dark brown, beige, white and sometimes blue. This intense chromatic variety guarantees a mysterious charm to a contemporary material, excellent for use in both internal and external environments given its compactness and high degree of resistance to acids and thermal changes.

**Applications:** claddings, floor tiles, kitchen and bathroom vanity tops

**Finishing:** Brushed, Bushhammered, Flamed, Honed, Polished, Sandblasted, Waterjet

**SCS**: *Stone Care System highly recommended for a longer duration.*
