

TECHNICAL INFORMATION

Measures: **320 x 200 cm**
Thickness: **3 cm**
Applied finishing: **Polished**
Cod: **bg17761**
Type: **Quartzite**
Origin: **Brazil**
Color: **Black**
Prices range: **Middle**

DESCRIPTION

Brillant Black is a Brazilian quartzite shaped by millennia of geological processes, its chromatic matrix dominated by an absolute black—a mineral void that seems to hold the memory of the depths from which it was born. Silvery veins and subtle gradients cross the surface in diagonal trajectories, like fissures of light carving through darkness. Each block displays an unrepeatable pattern, the result of timeless stratifications and metamorphic variations that nature never replicates twice. Thanks to the high concentration of quartz within its crystalline structure, Brillant Black possesses intrinsic resistance to impact, abrasion, and environmental agents. Its low porosity makes it naturally impermeable, ideal for flooring, architectural cladding, and high-performance work surfaces. This is a stone that does more than simply cover spaces: it sculpts them, defines them, and envelops them in a deep, magnetic aesthetic, where matter itself recounts its ancient story with primordial elegance.

Applications: claddings, floor tiles, kitchen and bathroom vanity tops

Finishing: Brushed, Bushhammered, Flamed, Honed, Polished,
Sandblasted, Waterjet
