

TECHNICAL INFORMATION

Measures: **335 x 200 cm**
Thickness: **2 cm**
Applied finishing: **Polished**
Cod: **bg17868**
Type: **Quartzite**
Origin: **Brazil**
Color: **Grey**
Prices range: **Premium**

DESCRIPTION

Redgold is a natural quartzite of Brazilian origin, an expression of an ancient and powerful geology. Its compact, crystalline structure is the result of metamorphic processes that endow the material with outstanding mechanical performance and remarkable chromatic depth. The elegant and luminous grey-cream background is crossed by dynamic red and orange veining, like flows of mineral energy running across the stone's surface, igniting each slab with a unique and unrepeatable character. The natural pattern, never repetitive, makes Redgold a living material, capable of interacting with light and space. From a technical standpoint, Redgold stands out for its high resistance to impacts, abrasion, water absorption and thermal shock. These qualities make it particularly suitable for prestigious architectural applications, both indoors and outdoors, including flooring, wall cladding, kitchen countertops, bathroom vanities and high-traffic or highly stressed surfaces.

Applications: claddings, floor tiles, kitchen and bathroom vanity tops

Finishing: Brushed, Bushhammered, Flamed, Honed, Polished, Sandblasted, Waterjet

SCS: Stone Care System highly recommended for a longer duration.
