

## TECHNICAL INFORMATION

Measures: **295 x 170 cm**  
Thickness: **2 cm**  
Applied finishing: **Honed**  
Cod: **vr10005**  
Type: **Marble**  
Origin: **Africa**  
Color: **Brown**  
Prices range: **Middle**

## DESCRIPTION

Bronze is a marble of North African origin, characterized by a brown background enriched with tone-on-tone shading and irregular veining in yellow, white, and golden hues, unevenly distributed across the surface. From a technical perspective, this stone features good structural compactness and natural mechanical strength, ensuring reliability and long-term stability. These properties make it suitable for use in both interior and exterior environments, provided appropriate surface treatments are applied. Thanks to the balance between technical performance and high aesthetic value, Bronze marble is recommended for flooring, wall cladding, staircases, architectural elements, and decorative surfaces, offering durability and a distinctive visual impact.

**Applications:** claddings, floor tiles, kitchen and bathroom vanity tops

**Finishing:** Brushed, Honed, Polished, Sandblasted

**SCS:** Stone Care System highly recommended for a longer duration.
