

TECHNICAL INFORMATION

Measures: **305 x 185 cm**
Thickness: **2 cm**
Applied finishing: **Honed**
Cod: **vr10153**
Type: **Marble**
Origin: **China**
Color: **Brown**
Prices range: **Elite**

DESCRIPTION

Amazon Forest marble is a highly prized natural stone originating from China, distinguished by its intense green color crossed by irregular veins in darker shades—black, brown, and sometimes white—creating dynamic patterns reminiscent of a tropical forest seen from above. Each slab is unique and highly decorative, which is why it is often used in high-end design projects such as kitchen countertops, wall cladding, bathrooms, and flooring. From a technical standpoint, it is highly resistant to scratches and heat, less porous than traditional marbles, and also suitable for certain outdoor applications. It pairs perfectly with natural woods, metals such as brass or gold, and neutral tones, making it an ideal choice for those seeking an elegant, striking material capable of becoming the focal point of a space.

Applications: claddings, floor tiles, kitchen and bathroom vanity tops

Finishing: Brushed, Bushhammered, Flamed, Honed, Polished, Sandblasted, Waterjet

SCS: Stone Care System highly recommended for a longer duration.
