Petrifed Wood Brown

Semiprecious • 305 x 175 x 2 cm

TECHNICAL INFORMATION

Sizes: **305 x 175 cm**
Thickness: **2 cm**
Applied finishing: **Polished**
Cod: **I6119**
Type: **Semiprecious**
Origin:
Color: **Brown**
Prices range: **Primary**

DESCRIPTION

Petrified Wood Brown is a semi-precious slab obtained from fossilized wood that has transformed into quartzite over millennia. Elements such as manganese, iron, and copper present in the sediment during the petrification process give petrified wood its wide range of colors. The organic material's replacement with minerals creates a precious and unique texture, characterized by a crystalline and slightly translucent structure. The result is a natural surface of great charm, capable of combining history, material richness, and refined aesthetics.

Applications: claddings

Finishing: Polished

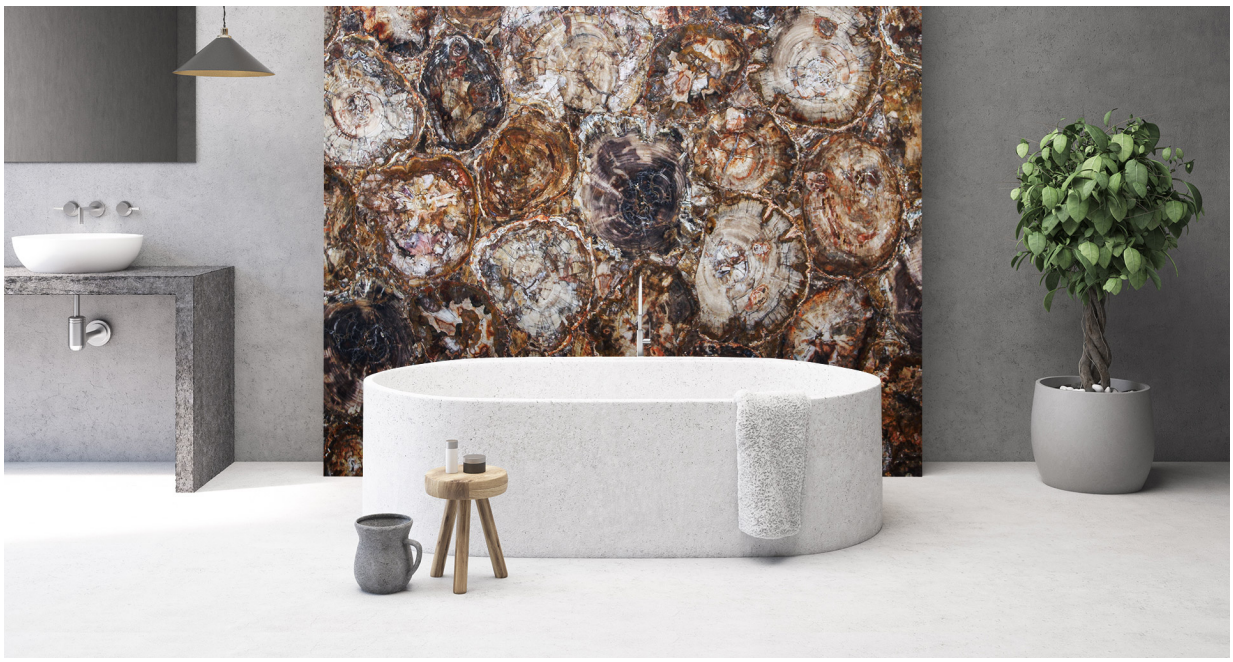

SCS: *Stone Care System highly recommended for a longer duration.*
