DESCRIPTION

Invictus is a quartzite extracted in Brazil with cold tones: the light grey that forms the background is crossed by irregular ramifications of small dark veins. Each slab is different from the previous one, and it is possible to work the material in open book stitch to create hypnotic shapes. This compact and resistant natural stone can be used as flooring or wall coverings in interior environments. Given its resistance to thermal changes, Invictus is also suitable for creating outdoor environments.

Applications: claddings, floor tiles, kitchen and bathroom vanity tops

Finishing: Bushhammered, Flamed, Honed, Polished, Sandblasted, Waterjet

SCS: *Stone Care System highly recommended for a longer duration.*
